The diagram illustrates the wiring for the CP1 19W power supply unit. On the left, a 3x0,50 mm² cable is connected to terminals PE, L, and N. The L and N terminals are connected to a motor symbol labeled 'M 1 ~' and 'CP'. On the right, a 2x0,50 mm² cable is connected to terminals NC and C, which are connected to a component labeled 'CPNC'. The diagram also shows connections for ground wires (GY) and a black wire (BK).
